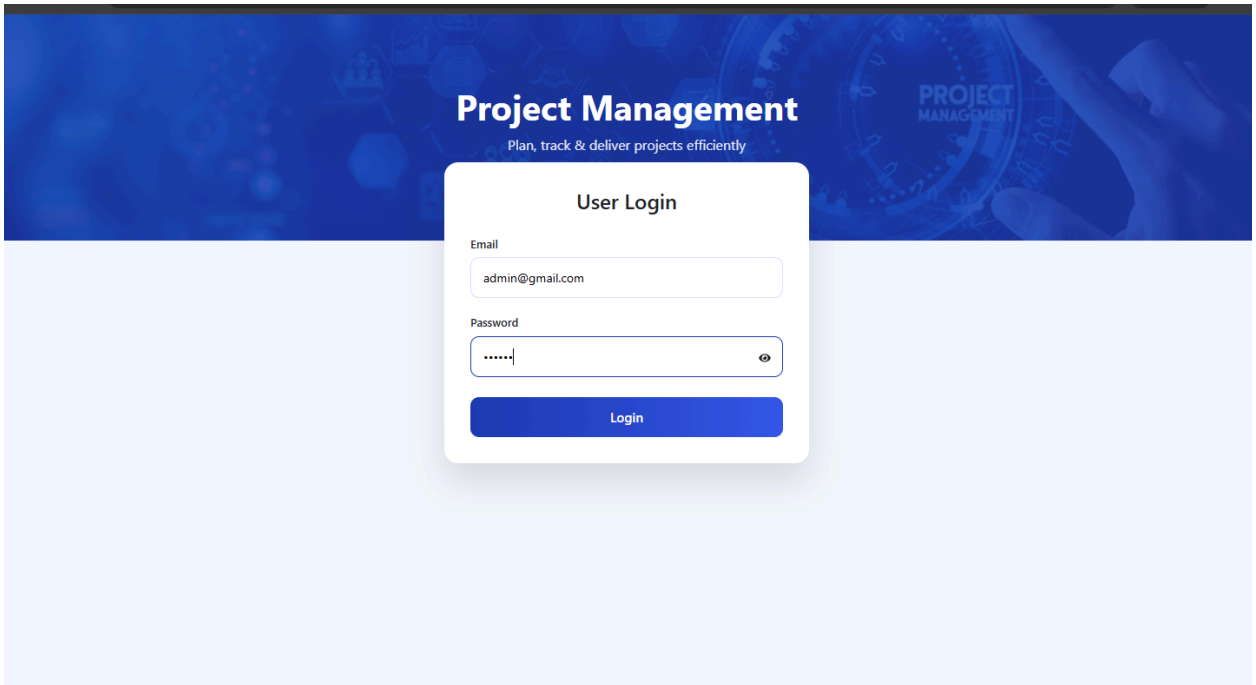
SARNIC Authentication Module

SARNIC – Live Project Testing Report

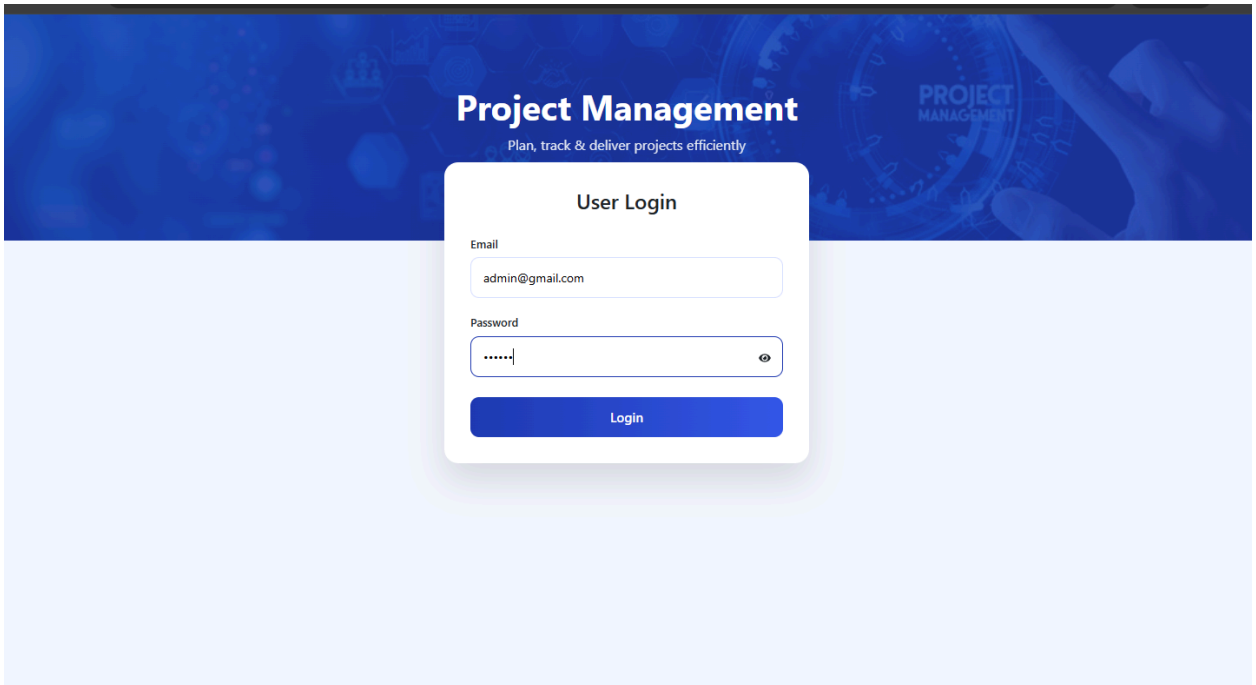


Admin Login

SARNIC – Live Project Testing Report

Authentication Module

Page Name: User Login Page



✅ **Working Functions**

1. **Email Input Field** – Working properly (User can enter email successfully)
2. **Password Input Field** – Working properly (Password masked input is functional)
3. **Show/Hide Password Icon (Eye Button)** – Working properly
4. **Login Button** – Working properly (User can login successfully)

🔍 **Testing Steps**

1. Open the SARNIC Project Web Application
2. Navigate to **Login Page**
3. Enter valid Email ID in the Email field
4. Enter Password in the Password field
5. Click on the **Login** button
6. System logs in the user successfully without any issue

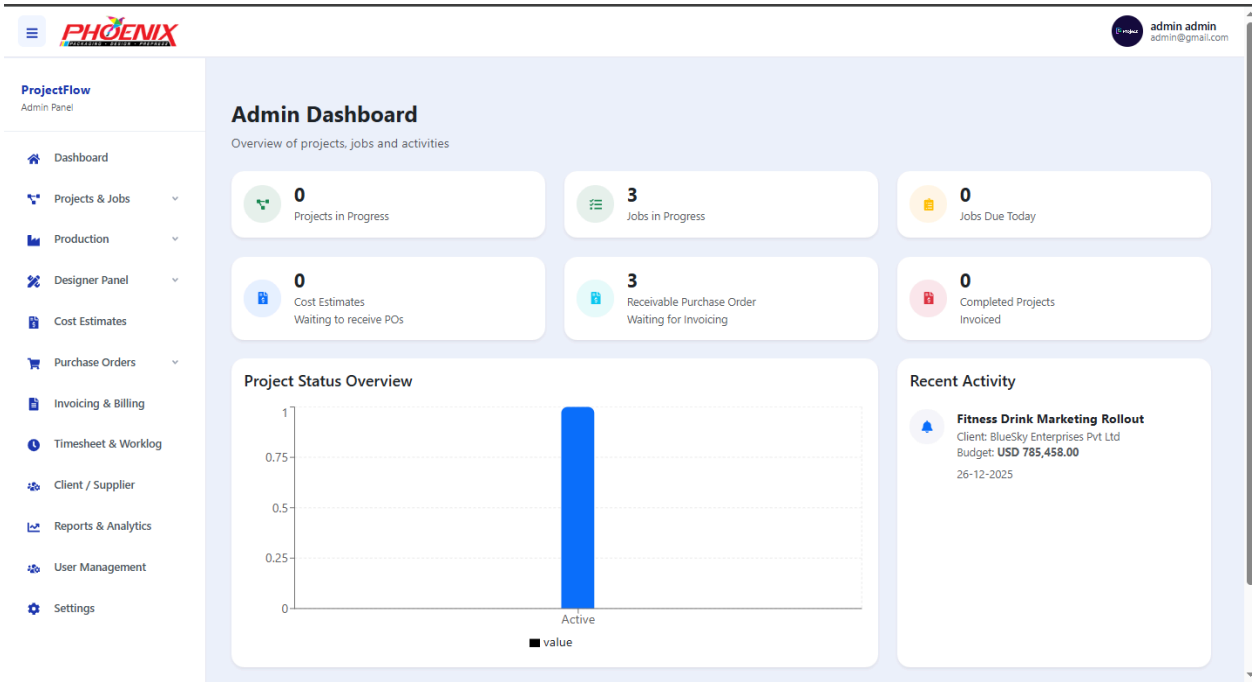
📌 **Result**

✅ **Login Page is functioning correctly. No issues found.**

Admin Dashboard

Admin Dashboard Module

Page Name: Admin Dashboard (Overview Page)



✅ Working Functions

1. **Dashboard Page Load** – Admin Dashboard successfully open
2. **Sidebar Navigation Menu** – All menus properly visible and accessible
3. **Project & Job Summary Cards** – Data cards displaying correctly
    - Projects in Progress
    - Jobs in Progress
    - Jobs Due Today
    - Cost Estimates
    - Receivable Purchase Orders
    - Completed Projects

4. **Project Status Overview Chart** – Chart section properly loading
5. **Recent Activity Panel** – Recent project/activity details showing correctly
6. **User Profile Display (Top Right)** – Logged-in admin information visible

---

🔍 Testing Steps

1. Login as Admin user
2. System redirects to **Admin Dashboard**
3. Verify sidebar menus are visible
4. Check all summary cards are displaying properly
5. Review Project Status chart section
6. Confirm Recent Activity panel is working

📌 Result

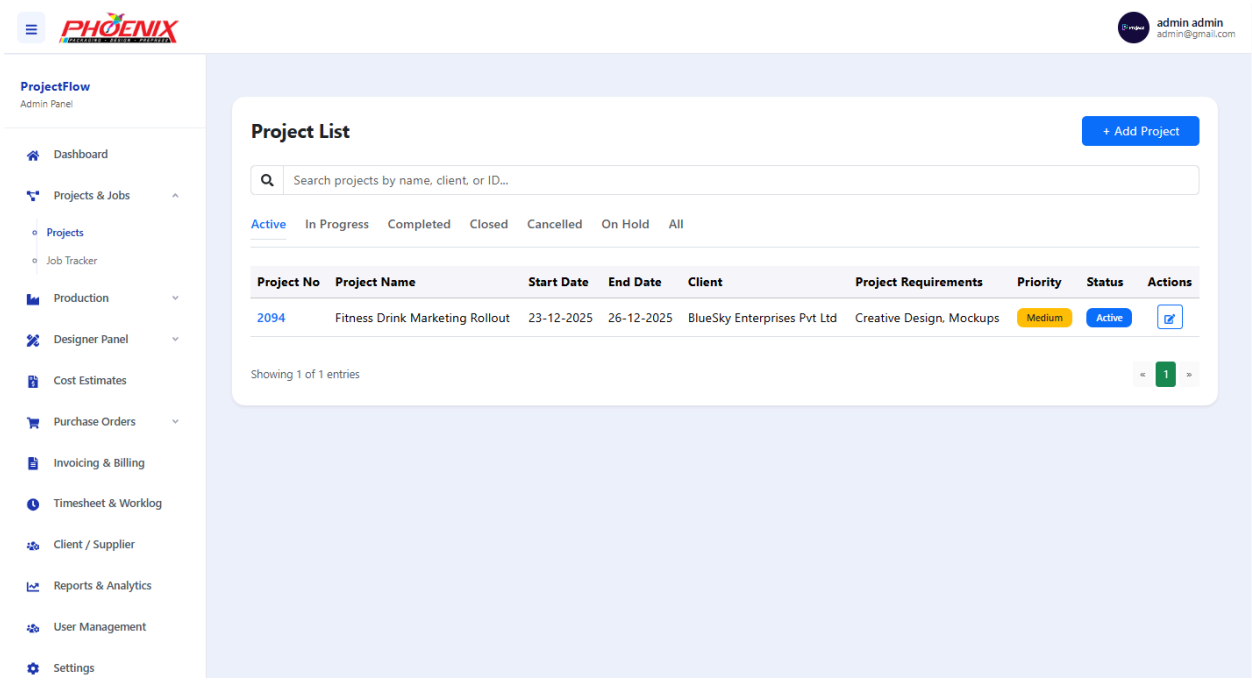
✅ **Admin Dashboard is functioning correctly. No issues found.**

Projects & Jobs

Projects & Jobs Module

Menu Name: Projects

Page Name: Project List Page



✅ Working Functions

1. **Project List Page Load** – Page successfully open
2. **Search Bar Functionality** – Projects ko name/client/ID search
3. **Project Status Tabs** – All tabs properly working
    - Active
    - In Progress
    - Completed
    - Closed
    - Cancelled

    - On Hold
    - All
4. **Project Table Display** – Project data correctly visible
    - Project No
    - Project Name
    - Start Date / End Date
    - Client
    - Requirements
    - Priority
    - Status
5. **Pagination Controls** – Page navigation properly working
6. **Actions Button (Edit/View)** – Working correctly

✅ Add Project Button & Form Testing

7. **+ Add Project Button** – Button working perfectly
8. **Add Project Form Open** – Form successfully open
9. **Project Creation Process** – New project add flow smooth i
10. **Form Submission** – Data save without any issue

🔍 Testing Steps

1. Login as Admin

2. Navigate to **Projects & Jobs → Projects**
3. Verify Project List is displayed
4. Use Search bar to find project
5. Switch between status tabs
6. Click on **+ Add Project** button
7. Fill the form details and submit
8. Confirm project is added successfully

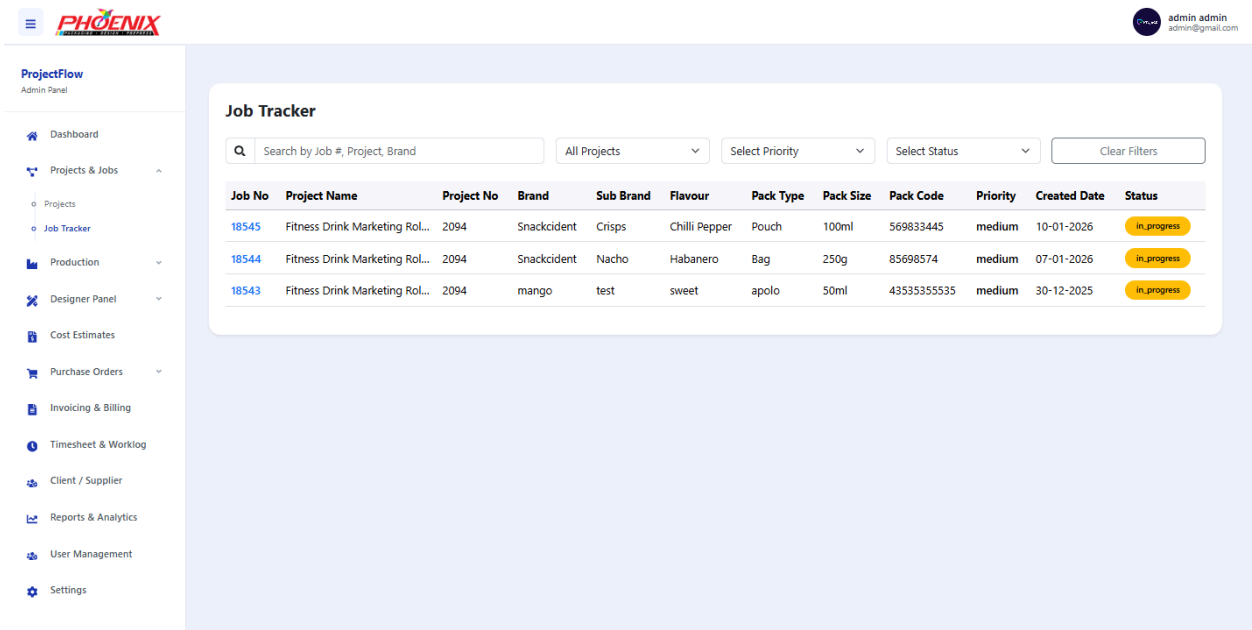
📌 Result

✅ **All functions on Project List Page are working properly.**
Add Project button and form are also functioning correctly. No issues found.

Projects & Jobs Module

Menu Name: Job tracker

Page Name: Job Tracker Page



✅ Working Functions

1. **Job Tracker Page Load** – Page successfully open ho raha hai
2. **Job Search Bar** – Job #, Project, Brand ke basis par search properly working
3. **Project Filter Dropdown (All Projects)** – Filter correctly working
4. **Priority Filter Dropdown** – Priority selection functional
5. **Status Filter Dropdown** – Status selection working properly
6. **Clear Filters Button** – Filters reset option available and working

---

✅ Job Tracker Table Display

7. **Job List Table** – Job details correctly show ho rahe hain
    - Job No
    - Project Name
    - Project No
    - Brand / Sub Brand
    - Flavour
    - Pack Type / Pack Size
    - Pack Code
    - Priority
    - Created Date
    - Status
8. **Job Status Badge (In Progress)** – Status display correctly visible

---

🔍 Testing Steps

1. Login as Admin
2. Navigate to **Projects & Jobs** → **Job Tracker**
3. Verify job list table is displayed
4. Use search bar to find specific job
5. Apply filters (Project, Priority, Status)
6. Click on **Clear Filters** button
7. Confirm all results update properly

📌 Result

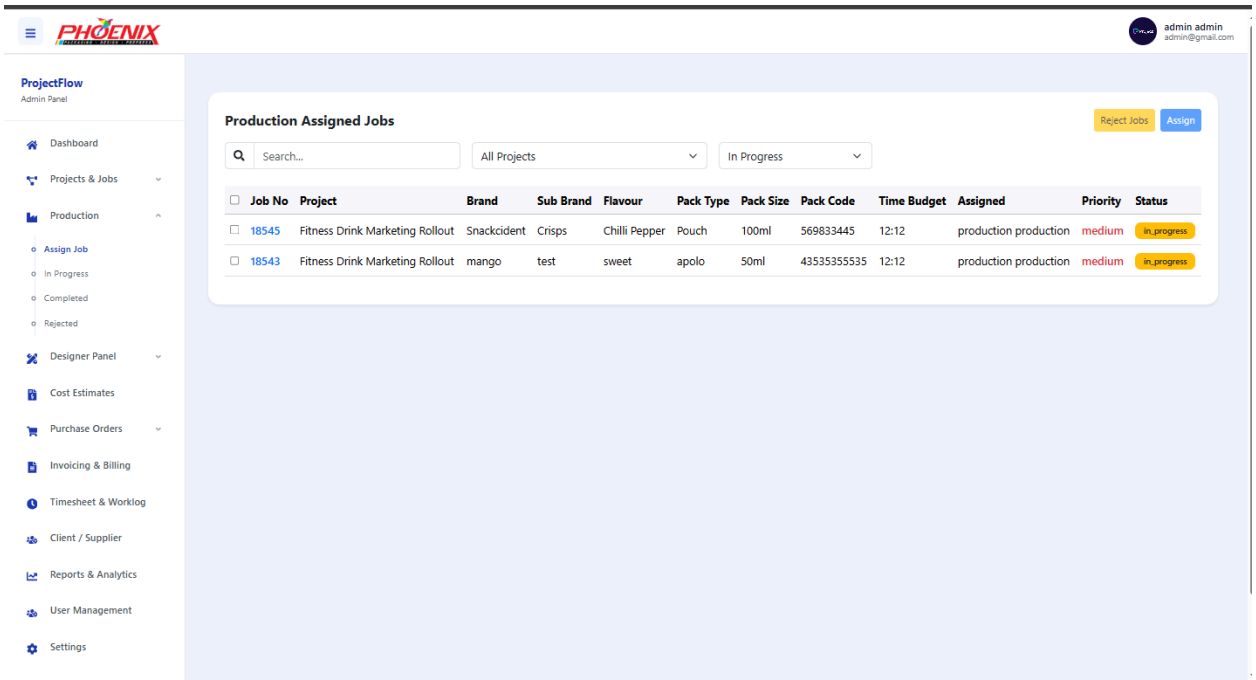
✅ Job Tracker page is functioning correctly. All filters, search, and job listing are working properly. No issues found.

Production

Production Module

Menu Name: Production

Page Name: Production Assigned Jobs (Assign Job)



✅ Working Functions

1. **Production Assigned Jobs Page Load** – Page successfully open
2. **Search Field** – Jobs search option working properly
3. **Project Filter Dropdown (All Projects)** – Filter correctly functioning
4. **Status Filter Dropdown (In Progress)** – Status-based filtering working
5. **Job Selection Checkbox** – Jobs select option available and working

---

✅ Action Buttons Testing

6. **Assign Button** – Assign job functionality working correctly
7. **Reject Jobs Button** – Job rejection option available and functional

---

✅ Assigned Jobs Table Display

8. Job details correctly visible in table:

- Job No
- Project Name
- Brand / Sub Brand
- Flavour
- Pack Type / Pack Size
- Pack Code
- Time Budget
- Assigned Department/User
- Priority
- Status (In Progress)

🔍 Testing Steps

1. Login as Admin
2. Navigate to **Production** → **Assign Job**
3. Verify assigned jobs list is displayed
4. Use search bar to find job

5. Apply project and status filters
6. Select job using checkbox
7. Click on **Assign** or **Reject Jobs** button
8. Confirm action is processed successfully

📌 Result

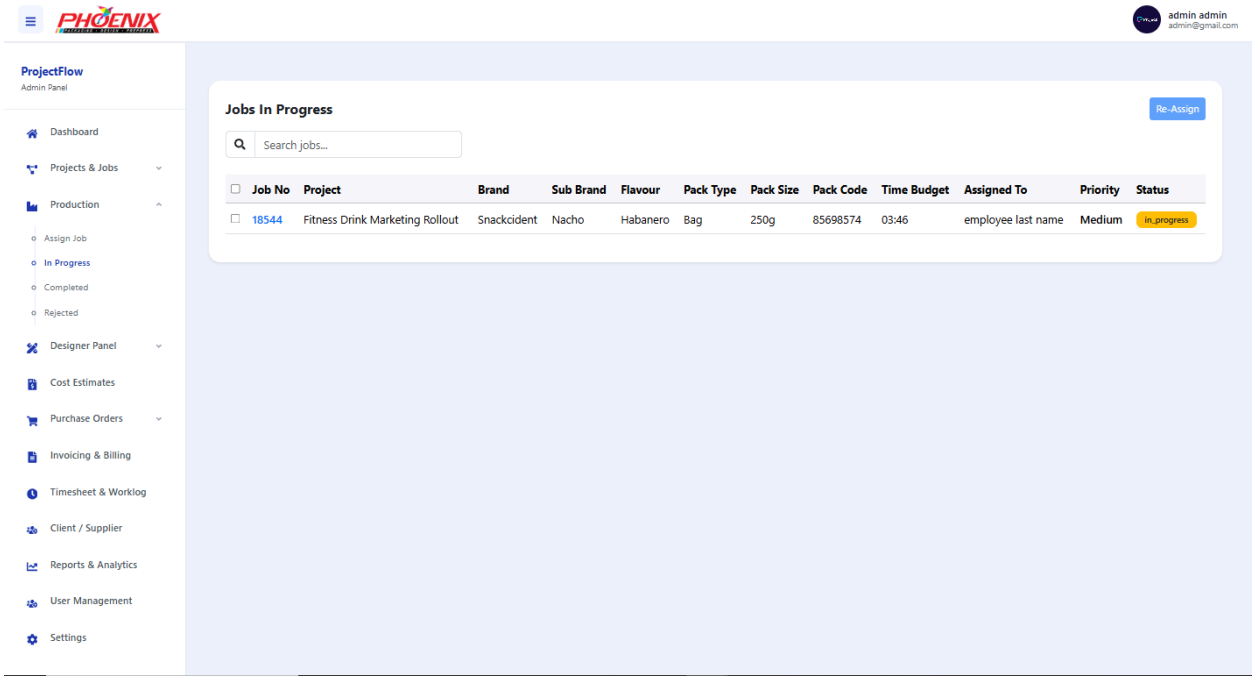
✅ **Production Assigned Jobs page is functioning correctly.**
All filters, selection, and action buttons are working properly. No issues found.

Production Module

Menu Name: Production

Sub Menu: In Progress

Page Name: Jobs In Progress Page



✅ Working Functions

1. **Jobs In Progress Page Load** – Page successfully open
2. **Search Jobs Field** – Jobs search k properly working
3. **Job Selection Checkbox** – Job select karne ka feature functional
4. **Re-Assign Button** – Re-assign job option available and working correctly

---

✅ In Progress Jobs Table Display

5. Job details correctly visible in table:

- Job No
- Project Name
- Brand
- Sub Brand
- Flavour
- Pack Type
- Pack Size
- Pack Code
- Time Budget
- Assigned To
- Priority
- Status (In Progress)

🔍 Testing Steps

1. Login as Admin
2. Navigate to **Production** → **In Progress**
3. Verify job list is displayed properly
4. Use Search bar to find specific job
5. Select job using checkbox
6. Click on **Re-Assign** button if required

7. Confirm job reassignment works successfully

📌 Result

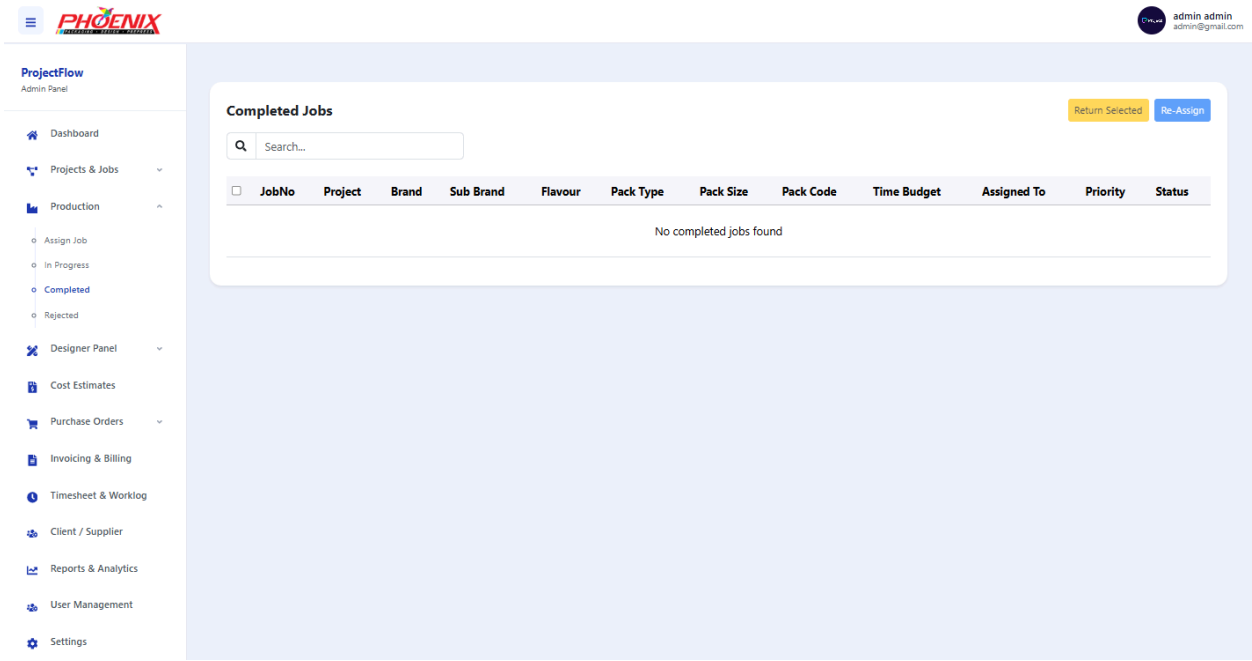
✅ Jobs In Progress page is functioning correctly.
Search, table view, and Re-Assign feature are working properly. No issues found.

Production Module

Menu Name: Production

Sub Menu: Completed

Page Name: Completed Jobs Page



✅ Working Functions

1. **Completed Jobs Page Load** – Page successfully open
2. **Search Field** – Completed jobs search option available and working
3. **Return Selected Button** – Action button visible and functional
4. **Re-Assign Button** – Re-assign option available and working properly

---

✅ Completed Jobs Table Status

5. **Jobs Table Display** – Table headers properly visible

6. System message correctly shown:

- **“No completed jobs found”**

This indicates there are currently no completed jobs available, which is expected behavior.

🔍 Testing Steps

1. Login as Admin
2. Navigate to **Production** → **Completed**
3. Verify Completed Jobs page opens correctly
4. Check table structure and action buttons
5. Confirm system shows message when no records exist
6. Search field interaction tested

📌 Result

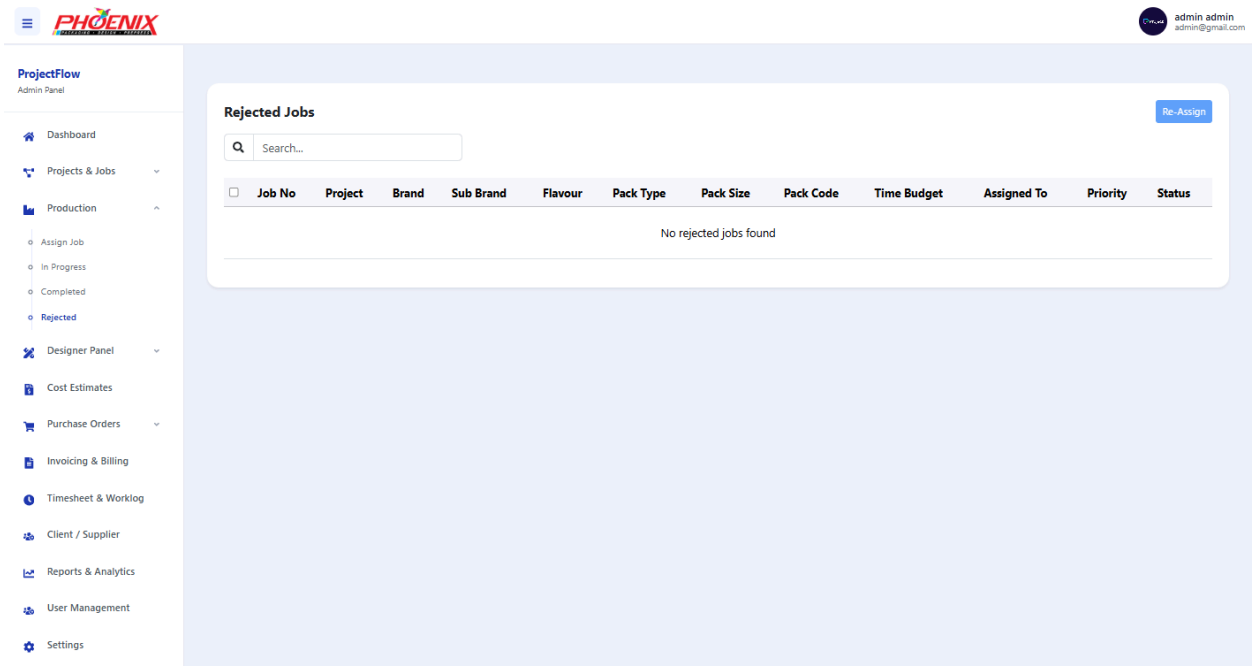
✅ **Completed Jobs page is functioning correctly.**
Search and action buttons are working properly.
No completed jobs available currently, system displays correct message.

Production Module

Menu Name: Production

Sub Menu: Rejected

Page Name: Rejected Jobs Page



✅ Working Functions

1. **Rejected Jobs Page Load** – Page successfully open
2. **Search Field** – Rejected jobs search option available and working
3. **Re-Assign Button** – Re-assign functionality available and working properly

---

✅ Rejected Jobs Table Status

4. **Jobs Table Display** – Table structure and headers properly visible
5. System message correctly shown:

- **“No rejected jobs found”**

This indicates currently no rejected jobs exist, which is expected behavior.

🔍 Testing Steps

1. Login as Admin
2. Navigate to **Production** → **Rejected**
3. Verify Rejected Jobs page opens correctly
4. Check table layout and action button visibility
5. Confirm correct system message when no records are available
6. Search field tested successfully

📌 Result

✅ **Rejected Jobs page is functioning correctly.**
Search and Re-Assign button are working properly.
No rejected jobs available currently, system displays correct message.

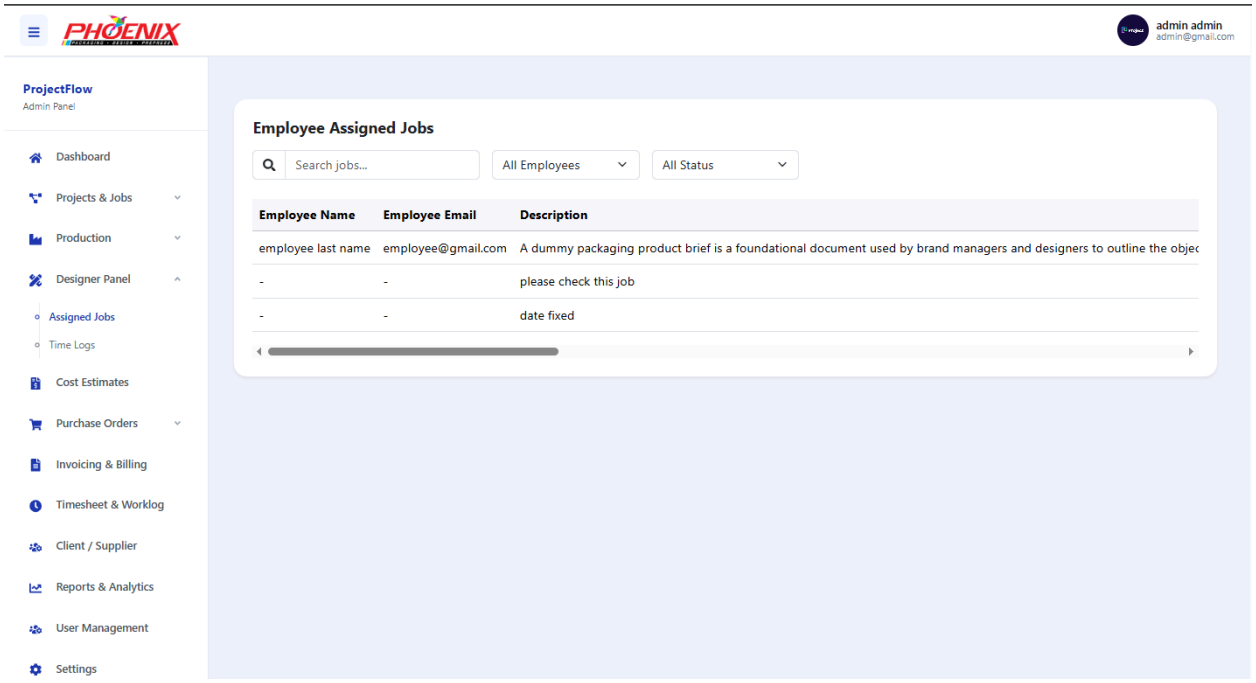
Designer panel

Designer Panel Module

Menu Name: Designer Panel

Sub Menu: Assigned Jobs

Page Name: Employee Assigned Jobs Page



✅ Working Functions

1. **Employee Assigned Jobs Page Load** – Page successfully open ho raha hai
2. **Search Jobs Field** – Assigned jobs ko search karne ka option working properly
3. **Employee Filter Dropdown (All Employees)** – Employee-wise filtering functional
4. **Status Filter Dropdown (All Status)** – Status-based filtering working correctly

---

✅ Assigned Jobs Table Display

5. Employee job details properly visible:

- Employee Name
- Employee Email
- Job Description

6. Table content properly load ho raha hai and scroll option available for long descriptions

---

🔍 Testing Steps

1. Login as Admin
2. Navigate to **Designer Panel → Assigned Jobs**
3. Verify assigned jobs list is displayed correctly
4. Use Search bar to find job
5. Apply Employee filter
6. Apply Status filter
7. Confirm job details are visible without any issue

📌 Result

✅ **Employee Assigned Jobs page is functioning correctly.**
Search and filters are working properly. No issues found.

Designer Panel Module

Menu Name: Designer Panel

Sub Menu: Time Logs

Page Name: Time Logs Page

✅ Working Functions

1. **Time Logs Page Load** – Page successfully open
2. **Search Time Logs Field** – Logs search working properly
3. **From Date Picker** – Date selection functional
4. **To Date Picker** – Date range filter working correctly
5. **Project Filter Dropdown (All Projects)** – Project-wise filtering properly working

---

✅ Time Logs Table Display

6. Time log details correctly visible in table:

- Job ID
- Project Name
- Assigned Employee
- Date
- Time Budget
- Work Time
- Overtime

- Total Time

7. **Total Summary Row** – Total Time Budget, Work Time, Overtime calculation correctly shown at bottom

---

🔍 Testing Steps

1. Login as Admin
2. Navigate to **Designer Panel** → **Time Logs**
3. Verify time logs list is displayed
4. Use Search bar to filter records
5. Select From & To date range
6. Apply Project dropdown filter
7. Confirm table updates correctly and totals are shown

📌 Result

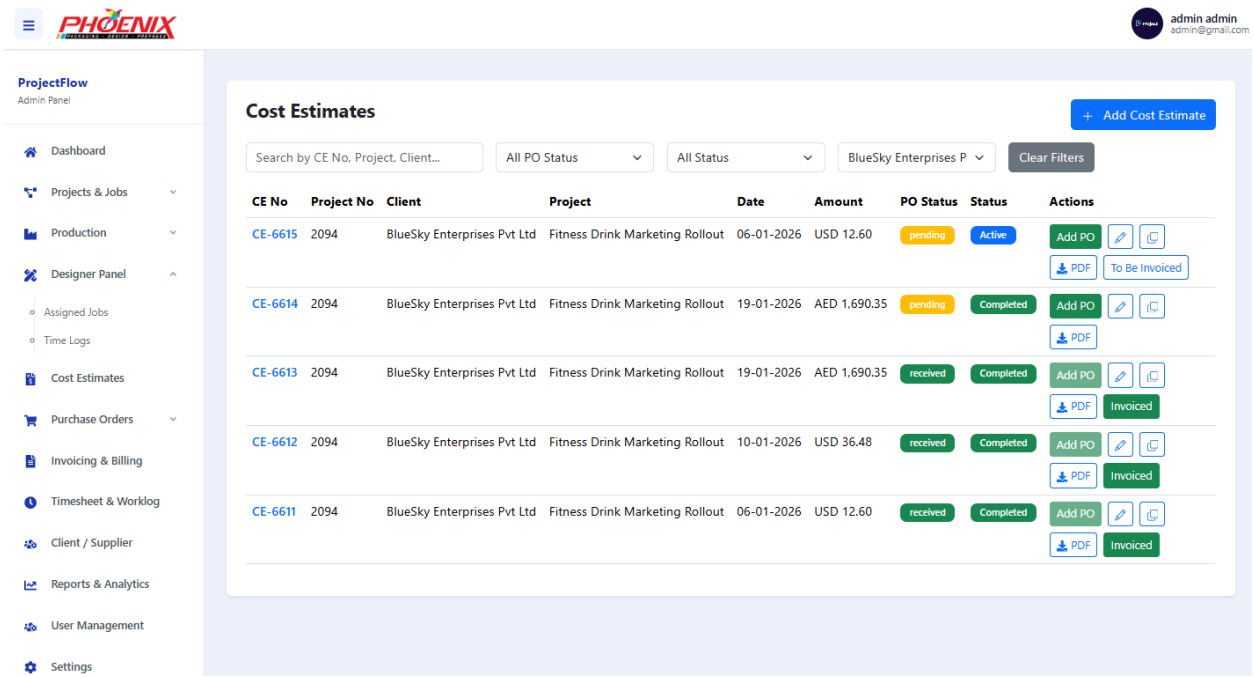
✅ Time Logs page is functioning correctly.
Search, date filters, project filters, and total calculations are working properly. No issues found.

Cost Estimates

Cost Estimates Module

Menu Name: Cost Estimates

Page Name: Cost Estimates Listing Page



✅ Working Functions

1. **Cost Estimates Page Load** – Page successfully open
2. **Search Bar** – CE No, Project, Client basis search properly working
3. **PO Status Filter Dropdown** – PO status-wise filtering functional
4. **Status Filter Dropdown** – Active/Completed filtering working correctly
5. **Client Filter Dropdown** – Client-wise filter properly working
6. **Clear Filters Button** – Filters reset option working fine

---

✅ Add Cost Estimate Feature

7. **+ Add Cost Estimate Button** – Button working properly
8. **Add Cost Estimate Form** – Form open and submission flow smooth

---

✅ Cost Estimates Table Display

9. Cost estimate details correctly visible:

- CE No
- Project No
- Client Name
- Project Title
- Date
- Amount
- PO Status (Pending/Received)
- Status (Active/Completed)

✅ Actions Buttons Testing

10. All action buttons working properly:

5. **Financial Summary Panel** – Invoice, PO, paid/unpaid amounts are displayed properly
6. **Productivity Panel** – Logged work hours and weekly hours data is visible and correct

---

🔍 Testing Steps

1. Login as Admin
2. Navigate to **Reports & Analytics** menu
3. Verify dashboard page loads correctly
4. Check summary cards for project/job counts
5. Review Job Status donut chart
6. Review Weekly Job Analytics bar chart
7. Scroll down to Financial Summary and Productivity sections
8. Confirm all analytics data is displayed properly

📌 Result

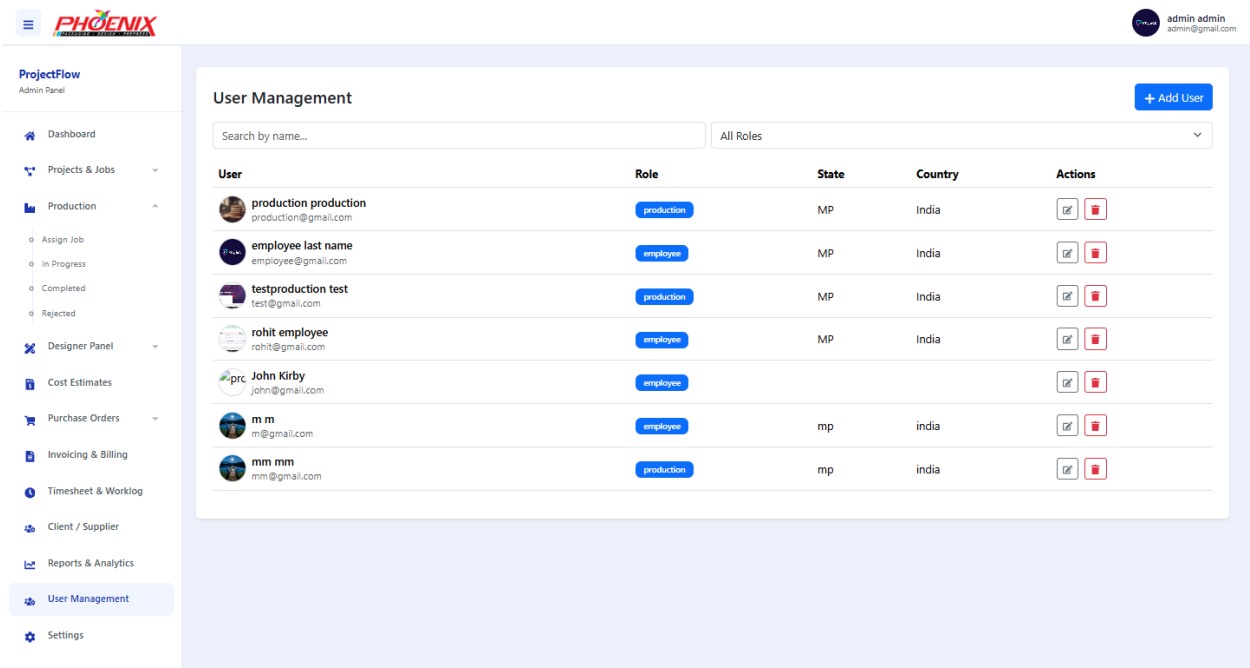
✅ **Reports & Analytics module is functioning correctly.**
All summary cards, charts, and analytics panels are working properly. No issues found.

User Management

User Management Module

Menu Name: User Management

Page Name: User Management Listing Page



✅ Working Functions

1. **User Management Page Load** – Page opens successfully without any issues
2. **Search by Name Field** – User search functionality is working properly
3. **Role Filter Dropdown (All Roles)** – Role-based filtering is functional
4. **User List Display** – All registered users are displayed correctly

---

✅ User Table Details Working

User information is correctly visible in the table:

- User Name
- Email Address
- Role (Production / Employee)
- State
- Country

✅ Action Buttons Testing

All action buttons are working properly:

1. **Edit User Button** – User details can be updated successfully
2. **Delete User Button** – User deletion option is available and functional

---

✅ Add User Feature

3. **+ Add User Button** – Button is working correctly
4. **Add User Form** – Form opens and user creation process works smoothly

---

🔍 Testing Steps

1. Login as Admin
2. Navigate to **User Management** menu
3. Verify the user list loads correctly
4. Search users by name using the search bar
5. Filter users by role using the dropdown

6. Click **Edit** button to verify update functionality
7. Click **Delete** button to verify removal option
8. Click **+ Add User** button and confirm form works properly

---

📌 Result

✅ **User Management module is functioning correctly.**
Search, filters, Add User, Edit, and Delete actions are working properly. No issues found.

Settings

Settings Module

Menu Name: Settings

Page Name: Settings Management (All Tabs)

Company Info Tab

Page Name: Company Information Settings

✅ Working Functions

1. Settings page loads successfully
2. Company Info tab opens correctly
3. Company Logo upload option is working
4. Company Stamp upload option is working
5. Company details form fields are editable and functional:

- Company Name
- Industry
- Address
- TRN
- Email

📌 Result

✅ Company Info tab is functioning correctly. No issues found.

Page Name: Job Settings Management

✅ Working Functions

1. Job Settings tab opens successfully
2. Sub-sections are visible and working properly:

- Brand Name
- Sub Brand
- Flavour
- Pack Type
- Industries

3. Industries list displays correctly
4. Add New Industry input field is working
5. **Add Button** successfully adds new entries
6. Delete option is available for removing industries
7. Delete Selected feature is visible and functional

📌 Result

✅ Job Settings tab is functioning correctly. All add/delete operations are working properly.

Tax Settings Tab

Page Name: Tax Categories Settings

✅ Working Functions

1. Tax Settings tab opens successfully
2. Tax Categories section loads properly
3. Tax input fields are editable and working
4. **Add Tax Category Button** is functional
5. Delete Tax Category button is available and working correctly

---

📌 Result

✅ Tax Settings tab is functioning correctly. Tax category management is working properly.

✅ Overall Result for Settings Module

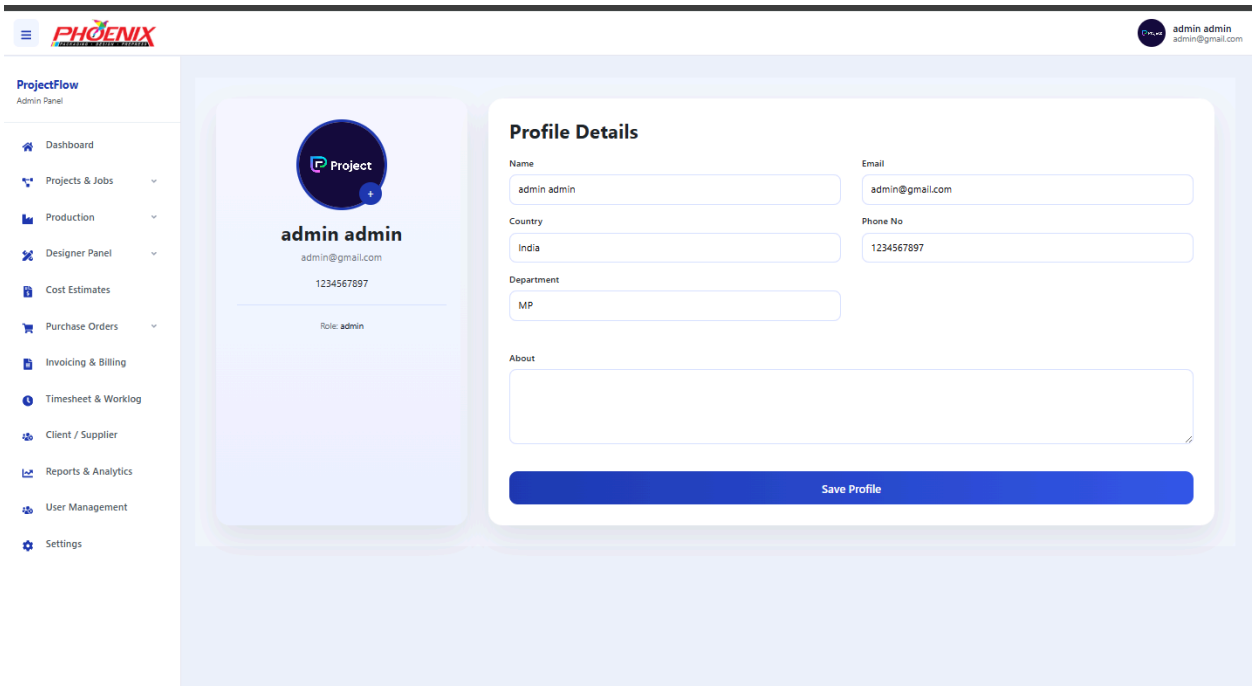
✅ All Settings tabs (**Company Info, Job Settings, Tax Settings**) are working perfectly.
No issues found in the Settings module.

Profile

Profile Module

Menu Name: Profile Details

Page Name: Admin Profile Details Page



✅ Working Functions

1. **Profile Details Page Load** – Page opens successfully without any issues
2. **Profile Information Display** – Admin details are shown correctly on the left panel
3. **Name Field** – Editable and working properly
4. **Email Field** – Displayed correctly and functional
5. **Country Field** – Editable and working properly
6. **Phone Number Field** – Editable and functional
7. **Department Field** – Working correctly

8. **Profile Image Section** – Profile icon and upload option visible

---

✅ Save Profile Feature

9. **Save Profile Button** – Button is working properly
10. Profile form data can be saved successfully without errors

---

🔍 Testing Steps

1. Login as Admin
2. Navigate to **Profile Details** page
3. Verify profile information loads correctly
4. Update fields such as Name, Country, Phone, Department
5. Click on **Save Profile** button
6. Confirm profile data is saved successfully

📌 Result

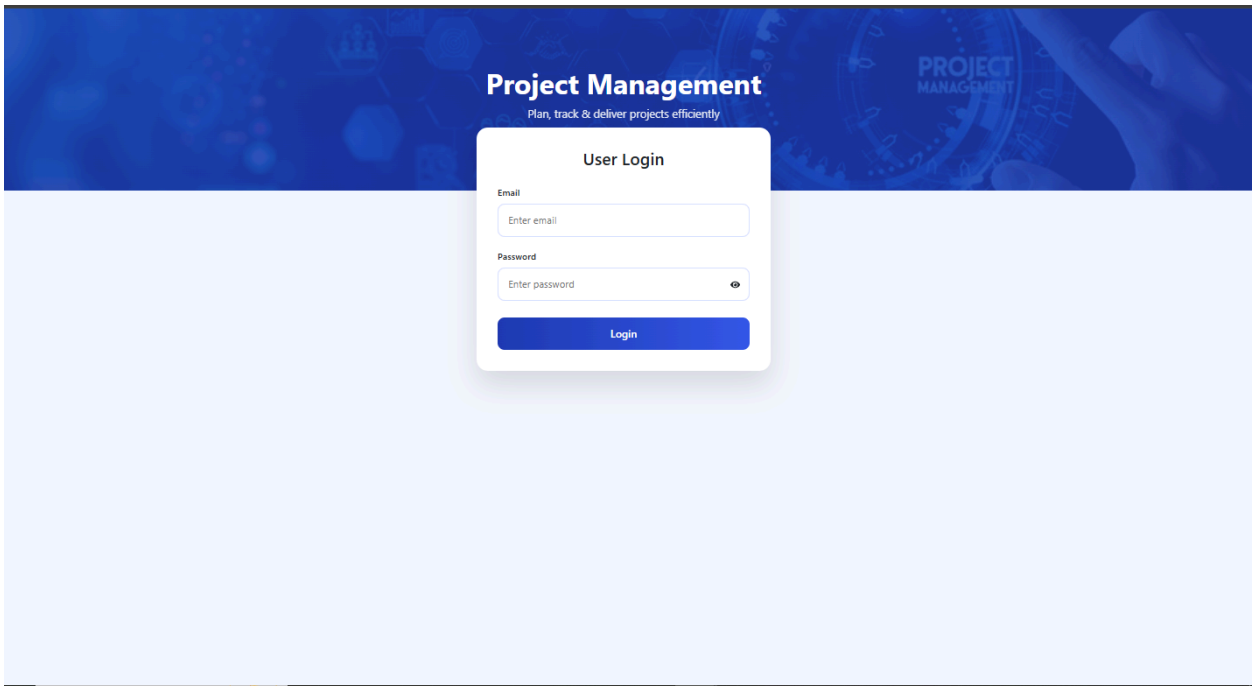
✅ **Profile Details module is functioning correctly.**
All profile fields and Save Profile feature are working properly. No issues found.

Employee Login

Authentication Module

User Type: Employee

Page Name: Employee Login



✅ Working Functions

1. **Employee Login Page Load** – Page opens successfully
2. **Email Input Field** – Working properly
3. **Password Input Field** – Working properly
4. **Show/Hide Password Option** – Functional
5. **Login Button** – Working correctly
6. **Employee Dashboard Redirect** – User is redirected successfully after login
7. **Session Handling** – Employee remains logged in without issues

---

🔍 Testing Steps

1. Open the SARNIC web application
2. Navigate to the **Employee Login** page
3. Enter valid employee credentials (Email + Password)
4. Click on the **Login** button
5. Verify employee dashboard opens successfully

📌 Result

✅ **Employee Login is functioning perfectly.**
All login fields and authentication flow are working properly. No issues found.

Employee Dashboard

Employee Dashboard Module

User Type: Employee

Menu Name: Dashboard

Page Name: Designer Dashboard (Employee Panel)

✅ Working Functions

1. **Employee Dashboard Page Load** – Dashboard successfully open ho raha hai
2. **Summary Cards Display** – All job status cards showing correctly:

- In Progress Jobs
- Completed Jobs
- Total Jobs Assigned

3. **Weekly Performance Section** – Weekly performance statistics loading properly:

- Jobs Completed
- Jobs Created
- Overdue Jobs
- Active Jobs

4. **Job Statistics Panel** – Job breakdown is visible and working correctly:

- Active Jobs
- In Progress
- Completed
- Pending Assignment

5. **Sidebar Navigation (Employee Menus)** – All employee menus visible and accessible:

- Dashboard
- My Jobs
- Projects & Jobs
- Time Tracking
- Job History

🔍 Testing Steps

1. Login using Employee credentials
2. System redirects to **Employee Dashboard**
3. Verify all job summary cards are displayed
4. Check Weekly Performance section
5. Review Job Statistics breakdown panel
6. Confirm sidebar menus are working and clickable

📌 Result

✅ **Employee Dashboard module is functioning perfectly.**
All dashboard components and navigation menus are working properly. No issues found.

My Jobs

My Jobs Module

User Type: Employee

Menu Name: My Jobs

Page Name: My Jobs Listing Page

✅ Working Functions

1. **My Jobs Page Load** – Page opens successfully without any issues
2. **Assigned Jobs Display** – Employee can view all jobs assigned correctly
3. **Job Status Visibility** – Job statuses are shown properly (In Progress / Completed / Pending)
4. **Job Details Access** – Employee can open and view job details smoothly
5. **Search/Filter Options** – Job search and filtering works correctly (if available)
6. **Job Actions** – Any available job action buttons are functioning properly

---

🔍 Testing Steps

1. Login using Employee credentials
2. Navigate to **My Jobs** menu from sidebar
3. Verify assigned job list is displayed correctly
4. Open any job to check details
5. Confirm job status and information is accurate
6. Test available job actions (if applicable)

📌 Result

✅ My Jobs module is functioning perfectly.
Employee can view and manage assigned jobs without any issues. No bugs found.

Projects & jobs

Projects Module

User Type: Employee

Menu Name: Projects & Jobs

Sub Menu: Projects

Page Name: Employee Projects Listing Page

✅ Working Functions

1. **Projects Page Load** – Page opens successfully without any issues
2. **Project List Display** – Employee can view assigned/available projects correctly
3. **Project Information Visibility** – Project details are displayed properly
4. **Search & Filter Options** – Employee can search projects smoothly (if available)
5. **Project Status Tabs/Labels** – Status display is working correctly
6. **Project Actions** – Any available project action buttons are functioning properly

---
